From the EDITOR'S NOTEBOOK - Bob Leckridge

The 58th Congress of the LIGA was held in Austria this year. [...] Interspersed with the “paper presentations” sessions were “workshops” which allowed for a more in depth exploration of some contemporary teachers – Massimo Mangialavori, Jan Scholten, Alphonse Geukens and Dietmar Payrhuber, amongst others.

Seminar zurück</p> <p>S04 Curing malignant diseases by homeopathy and critical review of combined approaches (conventional medicine/homeopathy)</p> <p>Dr. Dietmar Payrhuber Übersetzung: German</p> <p>Abstract The use of homeopathy in cancer cases is not only justified, but also indicated. The different approaches of both treatment methods – surgery, chemotherapy and radiotherapy on the one hand, and homeopathic treatment on the other – are presented. If it is possible to uncover the psychosomatic dimension of the case, both the conflict and the somatic manifestation of the tumour can be resolved.</p> <p>Keywords Malignant diseases, cancer cases, combined homeopathic/conventional approach, psychosomatic dimension.</p>
